

Joost Meijers is Professor of Experimental Vascular Medicine at the University of Amsterdam in the Netherlands. He is head of the laboratory of Molecular Hemostasis at Sanquin, and staff member of the Department of Experimental Vascular Medicine at the Amsterdam UMC. He was trained as a biochemist at Utrecht University, and has worked previously at the University Medical Center Utrecht and the University of Washington in Seattle. His research group aims to (better) understand the mechanisms of initiation and regulation of coagulation and fibrinolysis in order to improve the treatment of patients with bleeding or thrombosis. He is currently vice-chair of the SSC of the ISTH, and chair of the WHO-ISTH Standards Liaison Group.
